## Conflict Minerals Disclosure

KYOCERA SGS Precision Tools, Inc., formerly known as the SGS Tool Company and a wholly-owned subsidiary of KYOCERA Corporation, was originally founded in 1951 and is an ISO certified leader of round solid carbide cutting tool technology for the aerospace, metalworking, and automotive industries. Today, it is best known for its solid carbide high performance end mills and drills. However, it is also well known for its stainless steel medical tools and technically advanced, proprietary PVD coatings. KYOCERA SGS Precision Tools, with manufacturing sites in the United States and United Kingdom, aggressively services its customers through a global network of Sales Representatives, Industrial Distributors and Agents that sell into more than 60 countries.

The Kyocera Group's CSR activities are based on the Kyocera Philosophy, which uses as its decision-making criterion the principle to "Do what is right as a human being." Through our Kyocera Philosophy, we work to advance our corporate citizenship, build relationships of mutual trust with stakeholders, and aim for sustainable growth. At the same time, we endeavor to contribute to the healthy development of society.

As a manufacturer of solid tungsten carbide tooling, KYOCERA SGS Precision Tools is aware of and complies with Section 1502 of the Dodd-Frank Act. Section 1502 requires disclosure and reporting obligations concerning conflict minerals (tantalum, tin, gold or tungsten) that could potentially originate in the Democratic Republic of the Congo or an adjoining country.

KYOCERA SGS Precision Tools has a common sourcing function for the raw materials used within production. To comply with the requirements of Section 1502, KYOCERA SGS Precision Tools keeps an open dialogue with the suppliers over time and follows up to ensure that the contract is observed. The preferred method for documentation is RMI\_CMRT Template which suppliers submit as documentation of their compliance. KYOCERA SGS Precision Tools completes an annual review of each suppliers' documentation.

Through this process, KYOCERA SGS Precision Tools takes the proper steps to ensure our suppliers are compliant to the Dodd-Frank Act so that raw material is not sourced from the DRC or an adjoining country.
