 **KYOCERA**

FEATURES & BENEFITS

- *109 items in portfolio*
- *Fractional diameters ranging from .1285" - .2610"*
- *Metric diameters ranging from 3,2 - 6,7mm*
- *All items on 1/8" common shank to suit global application demands*
- *130 degree point angle*
- *Optimal end geometry ideal for targeted non-ferrous materials*
- *4-faceted point geometry provides centering assistance upon entry*
- *Mirror surface finish is applied to allow for smooth chip flow*
- *All micro tools are manufactured in accordance with KSPT ISO 9001:2015 quality standards*
- *Wide diameters offer ability to drill larger than average holes than is commonly possible in micro spindles*

KYOCERA SGS Precision Tools is a global leader in round solid carbide cutting tools and our products and services offer an unparalleled track record in performance, cost savings, quality and VALUE AT THE SPINDLE®.
